PROJECTS

E-Commerce Backend API
Tech Stack: *Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, JWT*

- Developed and deployed a backend API for an e-commerce application using FastAPI and PostgreSQL.
- Implemented REST endpoints for product management and database operations.
- Used SQLAlchemy for database interactions and Pydantic for request validation.
- Implemented JWT-based authentication and worked on authorization for protected endpoints.
- Configured deployment and troubleshot database connectivity and application errors.

WishBloom — Full-Stack Birthday Wish Application

Tech Stack: *Python, FastAPI, React.js, JavaScript, MongoDB, Tailwind CSS, JWT, Razorpay*

- Built and deployed a full-stack application for creating personalized birthday wishes and sharing them through public links.
- Developed backend APIs with FastAPI and integrated MongoDB for application data management.
- Implemented registration, login, token-based authentication, and protected features.
- Built React interfaces for wish creation, dashboards, public wish pages, and customization options.
- Integrated a Razorpay payment workflow for premium customization features.
